7 ways smells affect our mind brightside

May 31st, 2020 - the olfactory receptor or smell receptor is a protein capable of binding odor molecules that play a central role in the sense of smell olfaction according to the sirc while a rabbit has 100 million of these olfactory receptors and a dog 220 million humans have only about 5 or 6 million of them

but this amount of them is enough to have quite a bit of control over our lives,

'limbic signal a world without smells

March 26th, 2020 - self replicate first things first that s not a picture of me although it could be any one of us it s a painting by alex grey next the limbic signal is an extension of my book hidden scents the language of smell in the age of approximation which is a work of non fiction trying to understand the dearth of information on the topic of smell'

'the 10 worst smells in the world the richest

May 25th, 2020 - a good example is liquid ass a prank spray that is just one of the most disgusting smells in the world today this super concentrated liquid that evaporates in the open to fill the air with a foul but crack stench with hints of fresh poo and dead animal is the worst prank you can play on anyone" a world without smells ebook by lars lundqvist
